## Proximity Sensor with Separate Amplifier Enables Easily Making Highprecision Sensitivity Settings.

- Wide variety of Sensor Heads to select according to the application. Flexible cables are used between Preamplifiers and Amplifier Units of the Sensor Heads.
- High resistance to changes in ambient temperature.

Temperature characteristics of $0.08 \% /{ }^{\circ} \mathrm{C}$ (for 5.4-dia. models).

- Make simple and reliable detection settings with micron-level precision using the teaching function.
- Check the sensing excess gain level on the digital display.
- Support for high-precision positioning and screening with fine positioning to maximize variations.
- The E2C-EDA0 supports an EtherCAT Sensor Communications Unit or CompoNet Sensor Communications Unit.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Be sure to read Safety Precautions on page 10.

## Ordering Information

Sensors [Refer to Dimensions on page 12.]

## Sensor Heads

[^0]
## Amplifier Units

Amplifier Units with Cables

| Item |  | Appearance | Functions | Model |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | NPN output |  | PNP output |
| Advanced models | Twin-output models |  |  | Area output, open circuit detection, differential operation | E2C-EDA11 2M | E2C-EDA41 2M |
|  | External-input models |  | Remote setting, differential operation | E2C-EDA21 2M | E2C-EDA51 2M |

Amplifier Units with Wire-saving Connectors (An Amplifier Unit Connector (sold separately) is required.)

| Item |  | Appearance | Functions | Model |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | NPN output |  | PNP output |
| Advanced models | Twin-output models |  |  | Area output, open circuit detection, differential operation | E2C-EDA6 | E2C-EDA8 |
|  | External-input models |  | Remote setting, differential operation | E2C-EDA7 | E2C-EDA9 |

Note: These models allow you to use an E3X-DRT21-S VER. 3 Sensor Communications Unit. When using the E3X-DRT21-S VER.3, use an E3XCN02 Connector without a Cable for the Wire-saving Connector.

Amplifier Unit with Connector for EtherCAT or CompoNet Sensor Communications Units [Refer to Dimensions page 16]

| Item |  | Appearance | Functions | Model | Applicable Sensor <br> Communications Unit |
| :--- | :--- | :---: | :---: | :---: | :---: |
| Advanced model | Twin-output model |  |  | Area output, open <br> circuit detection, <br> differential operation | E2C-EDA0 |

Wire-saving Connectors (Order Separately)
Note: Protector seals provided. [Refer to E3X-DA-S/MDA.]

| Item | Appearance | Cable length | No. of conductors | Model |
| :---: | :---: | :---: | :--- | :--- |
| Master Connector |  |  | 4 | E3X-CN21 |
| Slave Connector |  | 2 m |  | 2 |
|  |  |  |  | 2 |

Ordering Precaution for Amplifier Units with Wire-saving Connectors
A Connector is not provided with the Amplifier Unit.
Refer to the following tables when ordering.

| Amplifier Unit |  |  |
| :---: | :--- | :--- |
| Model | NPN output | PNP output |
| Advanced models | E2C-EDA6 | E2C-EDA8 |
|  | E2C-EDA7 | E2C-EDA9 |

| Applicable Connector <br> (Order Separately) |  |
| :--- | :---: |
| Master Connector | Slave Connector |
| E3X-CN21 | E3X-CN22 |

[^1]Mobile Console (Order Separately) [Refer to E3X-DA-S/MDA.]

| Appearance | Model | Remarks |
| :--- | :--- | :--- |

Note: Use the E3X-MC11-SV2 Mobile Console with E2C-EDA-series Amplifier Units. If you use a Mobile Console like the E3X-MC11-S, some functions may not operate. For details, refer to Ratings and Specifications for E3X-DA-S/MDA.

## Accessories (Order Separately)

Mounting Bracket
A Mounting Bracket is not provided with the Amplifier Unit.
Order a Mounting Bracket separately if required.
[Refer to E39-L, F39-L, E39-S, and E39-R.]

| Appearance | Model | Quantity |
| :--- | :--- | :--- |
|  | E39-L143 | 1 |

End Plate
An End Plate is not provided with the Amplifier Unit. Order an End Plate separately if required.
[Refer to PFP- $\square$.]

| Appearance | Model | Quantity |
| :---: | :---: | :---: |
|  | PFP-M | 1 |

Extension Cables for Sensor Head
A Mounting Bracket is not provided with the Amplifier Unit. Order an Extension Cable separately if required.
[Refer to Dimensions on page 13.]

| Cable length | Model | Quantity |
| :--- | :--- | :--- |
| 2 m | E22-XC2R | 1 |
| 7 m | E22-XC7R |  |

## Nomenclature

## Amplifier Units

Twin-output Models
(E2C-EDA11/EDA41/EDA6/EDA8/EDA0)

External-input Models
(E2C-EDA21/EDA51/EDA7/EDA9)

## Safety Precautions

## Refer to Warranty and Limitations of Liability.

| WARNING |
| :--- |
| Do not use this product in any safety device used for the <br> protection of human lives. |

## Precautions for Correct Use

Do not use this product in operating atmospheres or environments outside the specified ratings.

## Amplifier Units

## Design

## Power ON

The Sensor is ready to sense an object within 200 ms after turning the power ON. If the load and Sensor are connected to different power supplies, always turn ON the Sensor power first.

## Cable

Use an external power cable of cross-section of $0.3 \mathrm{~mm}^{2}$ or more for the Amplifier, and the total length of the cable must be 30 m or less.

## Connecting Sensor Heads

Connecting and Disconnecting Sensor Heads

1. Open the protective cover.
2. Making sure that the lock button is up, insert the fibers all the way to the back of the Connector insertion opening.

To disconnect the Sensor Head, pull out the fibers while pressing on the lock button.

Connecting and Disconnecting Wire-saving Connectors
<Connecting Connectors>

1. Insert the Master or Slave Connector into the Amplifier Unit until it clicks into place.

2. Apply the supplied seal to the non-connection surface of the Master/Slave Connector.

Note: Apply the seal to the grooved side.

## <Disconnecting Connectors>

1. Slide the Slave Amplifier Unit.
2. After the Amplifier Unit has been separated, press down on the lever on the Connector and remove it. (Do not attempt to remove Connectors without separating them from other Amplifier Units first.)

Installing and Removing Amplifier Units
<Installing Amplifier Units>

1. Install the Units one by one to the DIN rail.

Sensor Head Connector Clips
2. Slide one Unit toward the other, match the clips at the front ends, and then bring them together until they "click."

## <Removing Amplifier Units>

Slide one Unit away from the other and remove them one by one. (Do not remove the connected Units together from the DIN rail.)

Note: 1. When the Amplifier Units are connected to each other, the operable ambient temperature changes depending on the number of connected Amplifier Units. Check page 5 in Rating and Specifications.
2. Before connecting or disconnecting the Units, always switch power OFF.

## End Plate Mounting (PFP-M)

Mount End Plates on Amplifier Units to avoid movement due to vibration. When a Mobile Console is installed, mount the End Plate facing as shown in the following diagram.

Mounting a Communications Head for the Mobile Console Leave a space of at least 20 mm on the left side of the Units for a Mobile Console Communications Head.

## EEPROM Write Error

If the data is not written to the EEPROM correctly due to a power failure or static-electric noise, initialize the settings using the keys on the Amplifier Unit.

## Optical Communications

When using more than one Amplifier Unit, mount the Units side-byside. Do not slide or remove Units while they are in use.

## Miscellaneous

## Protective Cover

Be sure to put on the Protective Cover before use.

## Mobile Console

Use the E3X-MC11-SV2 Mobile Console for E2C-EDA-series Amplifier Units. Other Mobile Consoles, such as the E3X-MC11, cannot be used.

## Sensor Head and Amplifier Unit Connection

Be sure to use only specified Sensor Head and Amplifier Unit combinations. The E3C-LDA-series Photoelectric Sensor with Separate Digital Amplifier is not compatible, and the E2C-EDA must not be used with products from that series.

## Warm-up

The digital display will slowly change until the circuits stabilize after the power is turned ON. It takes about 30 minutes after the power is turned ON before the E2C-EDA is ready to sense.

## Maintenance Inspection

- Be sure to turn OFF the power before adjusting, connecting, or disconnecting the Sensor Head.
- Do not use thinner, benzene, acetone, or kerosene to clean the Sensor Head or Amplifier Unit.

## Sensor Heads

## Mounting

Mounting Sensor Heads

- Use the dimensions from the following table to mount unthreaded cylindrical models (E2C-ED- $\square \square$ ). Do not tighten screws with torque exceeding 0.2 N•m when mounting Sensor Heads.

- Use the torque given in the following table to tighten threaded cylindrical models (E2C-EM $\square \square$ ).

| Model | Tightening torque |
| :--- | :--- |
| E2C-EM02 $\square \square$ | $15 \mathrm{~N} \cdot \mathrm{~m}$ max. |
| E2C-EM07M $\square \square$ | $15 \mathrm{~N} \cdot \mathrm{~m} \max$. |
| E2C-EM02H $\square \square$ | $5.9 \mathrm{~N} \cdot \mathrm{~m}$ max. |

- Do not use torque exceeding $0.5 \mathrm{~N} \cdot \mathrm{~m}$ to tighten screws when mounting flat models (E2C-EV $\square \square$ ).
- Use a bending radius of at least 8 mm for the Sensor Head cable.
- Use only the special extension cable to extend the cable between the Sensor Head and the Amplifier Unit.

| Model | Cable length |
| :--- | :--- |
| E22-XC2R | 2 m |
| E22-XC7R | 7 m |

## Effects of Surrounding Metal

- Provide a minimum distance between the Sensor and the surrounding metal as shown in the table below.
Effects of Surrounding Metal (Units: mm)

| Model | Counterbore A | Protrusion $\mathbf{B}$ |
| :--- | :--- | :--- |
| E2C-EDR6-F | 3.1 | 0 |
| E2C-ED01 $\square \square$ | 5.4 | 0 |
| E2C-ED02 $\square \square$ | 8 | 0 |
| E2C-EM02 $\square \square$ | 10 | 0 |
| E2C-EM07M $\square \square$ | 35 | 20 |
| E2C-EV05 $\square \square$ | $14 \times 30$ | 4.8 |
| E2C-EM02H $\square \square$ | 12 | 0 |

## Mutual Interference

- If more than one Sensor Head is installed face to face or in parallel, make sure that the distances between two Units adjacent to each other are the same as or larger than the corresponding values shown in the following table.
- The distance between Sensor Heads may be narrower than specified with these Sensors because the Mutual Interference Prevention Function is used for optical communications between the Amplifier Units.

| Mutual Interference |  |  |  | (Units: mm) |
| :---: | :---: | :---: | :---: | :---: |
| Model | Face-to-face arrangement A | Parallel arrangement $B$ | Face-to-face arrangement using the Mutual Interference Prevention Function $\mathrm{A}^{\prime}$ | Parallel <br> arrangement <br> using the Mutual <br> Interference <br> Prevention <br> Function B' |
| E2C-EDR6-F | 14 | 10 | 3.5 | 3.1 |
| E2C-ED01] | 45 | 20 | 9 | 5.4 |
| E2C-ED02■] | 35 | 30 | 21 | 8* |
| E2C-EM02 $\square$ | 36 | 30 | 21 | 10* |
| E2C-EM07MD] | 140 | 120 | 35 | 18* |
| E2C-EV05 $\square^{\text {] }}$ | 65 | 30 | 21 | 14* |
| E2C-EM02H $\square \square$ | 45 | 30 | 21 | 12* |

* Mutual interference does not occur for close-proximity mounting when the Mutual Interference Prevention Function is effective.

## Read and Understand This Catalog

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

## Warranty and Limitations of Liability

## WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

## LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.
IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## Application Considerations

## SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.
NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PROGRAMMABLE PRODUCTS
OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## Disclaimers

## CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.
It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products

DIMENSIONS AND WEIGHTS
Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

## PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

## ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.
