## GO FOR EXPERIENCE

# We have been supplying quality components for more than half a century 

The huge installed base of our easy-to-use control components, is proof of our experience. Our control products with a display provide the clearest visibility and a perfect read-out. Omron, your single source for all your control components needs.

## CELCIUXº - CONTROL AND CONNECTIVITY

## CelciuX0 - Multi Loop Temperature Controller

The CelciuX ${ }^{\circ}$ is designed to handle complex temperature profiles thanks to Omron's unique Gradient Temperature Control (GTC) algorithm and to offer easy program-less communication with Omron and third-party PLCs and HMI. Above all, the CelciuX ${ }^{\circ}$ incorporates all "simple to use" clever temperature control technology, like 2-PID, disturbance control and various ways of tuning.

- Interfaces to a wide range of industrial networks
- Reduced engineering due to program-less communications, Smart Active Parts and Function Block Libraries
- One unit handling various types of input, such as Pt, Thermocouple, mA, and V input

## Protect your heating application

This temperature monitoring relay was designed specially for monitoring abnormal temperatures to prevent excessive temperature increase and to protect equipment. K8AB-TH provides temperature monitoring in slim design with a width of just 22.5 mm .

- Simple function settings using DIP switch
- Selectable alarm latch and SV setting protection
- Multi-input support for thermocouple or Pt100 sensor input
- Changeover relay: fail-safe selectable
- Alarm status identification with LED

## Ideal for simple built-in control

This compact but powerful ON/OFF controller is provided with a sensor and is available in an analogue or digital version. Mounting is in-panel with a standard PTF14A-E socket.

- Available in 4 application specific ranges.
- Sensor provided to enable immediate usage.
- High capacity output of 10 A at 250 VAC for direct load switching.
- Simple operation and setting. Even simpler with digital model.

## Easy-to-use, basic temperature controller with analogue dial setting

Omron's basic ON/OFF or PD controller features an analogue setting dial. This compact, low-cost controller has a setting accuracy of $2 \%$ of full scale. It incorporates a plug-in socket allowing for DIN-rail or flush mounting.

- Compact, cost-effective controller
- Control mode: ON/OFF or PD
- Control output: relay
- Power supply: 100-120 / 200-240VAC

## The easy way to perfect temperature control

This multi-range 1/16 DIN controller with alarm function offers field-selectable PID control or ON/OFF control. The large, single display shows process value, direction of deviation from set point, output and alarm status.

- All setting field configurable with switches
- Multi-input (Thermocouple/Pt100)
- Clearly visible 3.5 digit display with character height of 13.5 mm
- Control output: relay, voltage (for driving SSR)
- ON/OFF or 2-PID control with auto-tuning and self-tuning

## Compact and intelligent general purpose controllers

The E5_N general purpose line of temperature controllers is available in 4 standard DIN formats. They all feature a high intensity dual LCD display with a wide viewing angle. The whole series features 3 colour PV change for easy status recognition.

- Control mode: ON/OFF or 2-PID
- Control output: relay, hybrid relay, voltage (pulse) or linear current
- Power supply: 100/240 VAC or 24 VDC/NAC
- Easy PC connection for parameter cloning, setting and tuning
- Clear and intuitive set-up and operation

## Advanced compact digital process controllers

The E5_K series of advanced controllers provides standard models and models with programmer functionality. The modular structure of the series makes it very versatile. A number of tuning functions are provided, including auto-tuning, self-tuning and fuzzy self-tuning.

- Size in mm (HxWxD): 96x48x100/53x53x100/96x96x100
- Control mode: ON/OFF or PID
- Control output: relay, SSR, voltage or current
- Universal inputs (Pt100/Thermocouple/Volt/Milliampere)
- Supported by ThermoTools PC Software

## CelciuX ${ }^{0}$ - Multi-Loop temperature control Control and Connectivity

CelciuX ${ }^{0}$ is designed to handle complex temperature profiles thanks to Omron's unique Gradient temperature Control (GTC) algorithm and to offer easy program-less communication with Omron and third-party PLCs and HMI. Above all, CelciuXº incorporates all "simple to use" clever temperature control technology, like 2-PID, disturbance control and various ways of tuning.

- Interfaces to a wide range of industrial networks
- Reduced engineering due to Program-less communications, Smart Active Parts and Function Block Libraries
- Available with screw terminals and screw-less clamp terminals
- One unit handling various types of input, such as Pt, Thermocouple, mA , and V input
- Gradient Temperature Control (GTC)

${ }^{\text {*1 }}$ For heating/cooling control applications, the auxiliary outputs on the 2-point models are used for cooling control. On the 4-point models, heating/cooling control can be performed for two input points only.
${ }^{* 2}$ 2 When using the heater burnout alarm, purchase a Current Transformer (E54-CT1 or E54-CT3) separately.
${ }^{* 3}$ An End unit is always required for connection to a Basic unit or an HFU. An HFU cannot operate without a Basic unit.

## Specifications

[^2]

## Universal compact digital process controllers

The E5_N-H series of process controllers take the proven concept of the general purpose E5_N series to a process level. Main features of the E5_N-H series are universal inputs, process outputs and options such as transfer output, remote setpoint and setvalue programmer.

- Control mode: ON/OFF or 2-PID, Valve control on EN-H/AN-H
- Control output: relay, voltage (pulse), SSR, linear current and voltage
- Power supply: $100 / 240$ VAC or 24 VDC/VAC
- Easy PC connection for parameter cloning, setting and tuning
- Clear and intuitive set-up and operation

## Fast, accurate and equipped for application specific needs

The E5_R series provides you with high accuracy inputs $\left(0.01^{\circ} \mathrm{C}\right.$ for Pt 100$)$ and a 50 ms sample and control cycle for all four loops. Its unique Disturbance Overshoot Reduction Adjustment ensures solid, robust control.

- Easy and clear read-out thanks to bright Liquid Crystal Display
- Exceptional versatility - multi-loop control, cascade control, and valve control
- Easy integration with DeviceNet, PROFIBUS or Modbus
- SV programmer optional, 32 programs with up to 256 segments

## Achieve low-cost measurements with an infrared thermosensor

This infrared thermosensor provides an accurate, stable and cost-effective way to measure the temperature of objects. It behaves just like a standard K-type thermocouple, which enables it to operate with any temperature controller or alarm unit.

- Cost-effective infrared thermosensor
- Contactless, meaning no deterioration, unlike thermocouples
- 4 temperature ranges available: $10-70^{\circ} \mathrm{C}, 60-120^{\circ} \mathrm{C}, 115-165^{\circ} \mathrm{C}$ and $140-260^{\circ} \mathrm{C}$
- Response speed 300 ms

## Achieve Superior Environmental Resistance and a Wide Measurement Range of 0 to $400^{\circ} \mathrm{C}$.

This gateway supports all CompoWay/F equipped products, including temperature controllers, digital panel indicators, etc. It can also be used for connecting MCW151-E and E5_K series.

- Flexible placement with slim cylindrical shape and long focus with a distance of 500 mm and area diameter of 80 mm .
- The SUS body and silicon lens resist ambient operating temperatures of up to $70 \times \mathrm{C}$ and resist dust and water to the equivalent of IP67.
- Fast measurement with high-speed response of $100 \mathrm{~ms} / 90 \%$.
- Strong resistance to noise with output of 4 to 20 mA .

## PREVENT YOUR SYSTEM FROM STOPPING

## S8TS-DCBU-02 - Buffer block against momentary power failures

The buffer block prevents equipment stoppage, data loss and other problems resulting from momentary power failures. One S8TS-DCBU-02 buffer block provides a back-up time of 500 ms at an output current of 2.5 A . Can be wired to the 24 VDC output from any switch mode power supply

- Connects to both single-phase and three-phase 24 VDC power supplies
- Connects to an S8TS power supply via an S8T-BUS03 bus line connector
- Parallel connection up to 4 units to increase back-up time and capacity

## Compact power supply

The S8VS is our standard industrial din-rail mounted power supply. It is built to last forever. Up to 60 W we provide them into a plastic housing, from 120 W the S8VS is built in strong metal case. The full ranges provide a very good dimension/output power ratio to optimize panel space uses. The range covers 6 models at 24 VDC with wattage of $15,30,60,120,240$ and 480 W . The 15 and 30 W are also available in 5 or 12 VDC output voltage. The range withstands high vibration and shocks.
The S8VS are fan-less power supplies.

- Wide AC input range from 85 to 264 VAC
- Micro S8VS output power range 15 and 30 W at 5, 12 and 24 VDC
- Micro can mounted, standard din-rail, horizontal or facing horizontal any direction is okay
- S8VS models available from 60 to 480 W at $24 \mathrm{VDC}, 4$ models

## Slim size S8VM power supplies

All models have the same height of only 84.5 mm . These ranges cover up-to $1,500 \mathrm{~W}$. The output voltages are $5,12,15$ or 24 VDC . In this series we have standard types and versions with two alarms up-to 150 W models: one for short dip in the 24 VDC supply, second one when the voltage gradually drops in time. The models form $300 \mathrm{~W} / 600 \mathrm{~W} / 1,500 \mathrm{~W}$ are equipped with an overload alarm function.

- Widest range in DC-output voltage ( $5 \mathrm{~V}, 12 \mathrm{~V}, 15 \mathrm{~V}$ \& 24 V ) \& wattage (15 up-to 1,500 W)
- LED indication power ON
- Transistor output \& LED indication under-voltage alarm $1 \& 2$ or Power failure
- All models can be Din-rail mounted (except 1,500W)
- EMI Class B, UL Class 1 division 2, SEMI-F47 (200VAC input)

## Slim \& economic power supply

The S8JX-G is Omron's cost effective power supply delivering Omron's quality and reliability. The range of this Power Supply covers up to 600 W , the output voltages are 5,12 or 24 VDC. The low profile and multiple mounting options help you reduce panel space. With a minimum life expectancy of 10 years and protection against over-voltage, over-current and short circuiting, the S8JX-G is as reliable as you may expect from Omron.

- Wide range in DC-output voltage ( $5 \mathrm{~V}, 12 \mathrm{~V}, 15 \mathrm{~V}$ \& 24 V ) \& wattage ( 15 to 600 W )
- LED indication power ON
- Over-voltage, over-current, and short circuit protection
- Vibration resistance $4,5 \mathrm{~g}$
- All models can be DIN-rail mounted
- Approvals: UL, cUL, UL508 Listed, CE, SEMI F47, VDE

## Industrial use, modular power supply for multiple configurations

The S8TS is an expandable power supply; standard units can easily be snapped together in parallel to provide you with ultimate flexibility. Expandable up to 4 units, it can deliver a total power of 240 W at 24VDC or a multi-output configuration.

- Improves system reliability by building up $\mathrm{N}+1$ redundancy
- Standard unit; 60 W at 24 VDC, 30 W at 12 VDC and 25 W at 5 VDC
- Battery back-up unit protects against power outage (see accessories)
- Buffer unit protects against power glitches and outage (see accessories)
- EMI Class B, UL Class 2, UL Class 1 division 2

## S8T-DCBU-01

The S8T-DCBU-01 battery backup block supplies 24 VDC for a fixed period of time during AC input outages to considerably improve system reliability.

- Supplies 24 VDC for a long period of time during AC input outages
- For system reliability improvement
- Block power supply basic block is connected by the bus line connector
- Simple system configuration
- Alarms indicated on main unit and via alarm signal output

## Ordering information

Note:The S8TS DC back-up block is for S8TS power supplies only.

## S8T-DCBU-02

Prevents equipment stoppage, data loss and other problems resulting from momentary power failures. One S8T-DCBU-02 buffer block provides a back-up time of 500 ms at an output current of 2.5 A . Can be wired to the 24 VDC output from any switch mode power supply.

- Connects to all Omron power supplies: S8TS, S8VS, S82J, S82K, S8VM, S8PE
- Connects to both single-phase and three-phase power supplies
- Connects to an S8TS power supply via an S8T-BUS03 bus line connector
- Parallel connection up to 4 units to increase back-up time and capacity
- Complies with Semi F47-0200 standard

## Compact 3-phase input power supply

To make the compact power supply range complete we have our 3-phase S8VT series, which give you the best power to footprint ratio. The range exists of 4 models with wattage of $120,240,480$ and 960 W all at 24 VDC . This version is constructed from a very robust metal housing and all models are din-rail mounting. The input range cover 3 phase voltage input from 340 to 576 VAC and single phase DC input from 480 to 810 VDC.

- 5, 10, 20 and 40A; 24VDC output
- 3-phase input (340-576VAC) or 1-phase 480 to 810 VDC
- Compact design with best footprint on the market
- UL60950 (CSA22.2-60950), UL508 listing (CSA22.2-14) and CE
- Parallel \& serial operation possible (all models)

## WHEN TIMING ACCURACY MATTERS!

## H5CX - The most complete digital timer

The H5CX series offers multiple-functions and -timing ranges for precise timing control, as well as real twin-timing and memory function. These and other added-value features ensure that the H5CX covers almost every possible user requirement in timers.

- 15 different time functions
- Three colour display value, red, orange or green
- Models with instantaneous contact outputs
- 0.001 s to $9999 \mathrm{~h}, 10$ ranges

## DIN $48 \times 48 \mathrm{~mm}$ multi-functional timer series

This elaborate range of solid state timers provides you with a multi-functional timer, twin timer, star-delta timer and a power OFF-delay timer.

- $48 \times 48 \mathrm{~mm}$ front-panel/plug-in
- High-/low-voltage models (except -H and -G)
- 0.05 s to 300 h (except -H and -G)
- DPDT, 5A at 250VAC
- Transistor 100 mA at 30VDC

## The most complete digital standard timer on the market

H5CX offers you the most complete series of products on the market today. Based on extensive customer research, these new timers have been designed with value added features that users both need and appreciate.

- Size in mm (HxWxD): 48x48x59 to 78 mm
- Three colour display value, red, green or orange
- Models with Instantaneous Contact Outputs
- 0.001 s to 9999 h, 10 ranges
- Input NPN, PNP and contact

## DIN-sized (48x48) motor timer with variable time ranges

This motor timer series provides you with many features, such as 0 N -delay, time indicator, moving pointer and synchronous motor. Moreover, the LED indicator shows the time operation, time range and the rated voltage.

- DIN-sized 48x48mm
- Front-panel/plug-in/DIN-rail
- All supply voltages available
- 0.2 s to 30 h
- SPDT, 6A at 250VAC

## MULTI-FUNCTIONAL PRESET COUNTER

## H7CX - Designed with value added features

The H7CX series offers the ultimate in versatility and intuitive programming.

- 7 basic functions in one
- Switching colour on threshold, green, orange \& red
- Twin counter mode
- 12 different outputs modes
- Display 6 digits from $-100 \mathrm{~K}+1$ up to $1 \mathrm{M}-1$

What is the type of counting application?

## World's smallest compact preset counter/timer

The H8GN is a $1 / 32$ DIN timer and counter in one. It is simple to switch between the timer and counter functions. During operation it is also possible to switch the display to monitor the totalising count value in 8 digits. Many sophisticated functions come as standard with H8GN.

- Size in mm (HxWxD) $24 \times 48 \times 83,1 / 32$ DIN size housing
- 8 digit display, 4 value and 4 set value
- Front mounting
- -999 to 9999

## The most complete digital standard counter on the market

H7CX offers you the most complete series of products on the market today. Based on extensive customer research, these new counters have been designed with value added features that users both need and appreciate.

- Size in $\mathrm{mm}(H x W x D) 48 \times 48 \times 59$ to $78 \mathrm{~mm} 1 / 16$ DIN size housing
- Three colour display value, red, green or orange
- Twin counter mode
- 6 digit model -99,999 to 999,999, set value -99,999 to 999,999 or 0 to 999,999
- Input contact, NPN or PNP

## FLEXIBLE AUTOMATION EXPANDED

## ZEN-C4 - More flexibility with RS-485 communication

Our range is extended with a communication model. Now you have the possibility to connect several ZEN in a network environment. This will enhance the ZEN series to solve even more applications.

- RS-485 communication
- To connect up to 32 units
- Easy CompoWayF protocol

What functionality is required?

## Flexible automation

The ZEN-10C offers simple logic control in a choice of four CPU units. Expansion is possible on three of these CPU's of up to $34 \mathrm{I} / 0$ whereas the fourth (C3 Units) is fixed at $10 \mathrm{I} / 0$. All DC models have analogue input and a high-speed counter input up to 150 Hz .

- DC input/supply units have analogue input + high speed counter
- The ZEN-10C4 has RS-485 communication
- Expansion available with relay output or transistor output
- ZEN-Kits the best choice to start!

## Extended flexible automation

Ideal for small-scale control applications, the ZEN-20C provides an economical alternative to discrete timers, counters and general purpose relays. With 12 Inputs and 8 relay or transistor Outputs, and expansion possibilities of up to 44 I/O on C1 and C2 models, the ZEN-20C offers extended flexibility, with features such as calendar and real time clock functionality.

- ZEN-20C1/C2 expandable up to 44 I/Os
- ZEN DC units have analogue input 0-10 VDC
- DC models have as well high speed counter 150 Hz
- Expansion available with relay output or transistor output

## ZEN Expansion units

To enlarge your ZEN application we provide three different expansion units in only 35 mm width ZEN housing. All expansion units have standard 4 inputs and 4 outputs. You can add maximum 3 expansion units to one CPU.

- 4 inputs, 100 to 240VAC or 12 to 24 VDC
- 4 outputs, either relays or transistors (only DC models)
- DIN-rail mounting
- Size in mm (HxWxD): 90x35x56

## ZEN Power Supply

The ZEN Power Supply has the same compact housing as our $10 \mathrm{I} / 0 \mathrm{CPU}$ units. With a current/wattage output of $1.3 \mathrm{~A} / 30 \mathrm{~W}$ it covers enough power to supply the DC ZEN itself and the eventually used sensors. If needed parallel operation is possible.

- Output voltage 24 VDC
- Output current 1.3 A
- Capacity 30 W
- Allows parallel operation
- Size in $\mathrm{mm}(H x W x D): 90 x 70 \times 56$

## LOOKING FOR PERFECT MEASURING \& READ-OUT?

## K3HB-V - For perfect weighing

With our K3HB series we cover a wide range of applications. One of them is the weighing indicator which performs perfect measurement in any weighing application. The instrument can be equipped with a load-cell power supply of $10 \mathrm{~V} / 100 \mathrm{~mA}$.
Several option boards for communication, contact output boards or event inputs are also available. On top of these you can get direct DeviceNet communication.

- High speed sampling 20 ms
- Equipped with position meter
- Two colour display for easy recognition

## Compact and intelligent digital panel meter

The K3GN is able to cover a wide variety of applications with its 3 main functions: process meter, RPM processor/tachometer and digital data display for PC/PLC. Configuration is easy and the design is advanced and compact.

- Process indicator DC voltage/current
- RPM process/tachometer
- Digital data display for PC/PLC
- Very compact $1 / 32$ DIN housing: Size in $\mathrm{mm}(H x W x D)$ : $24 \times 48 \times 83 \mathrm{~mm}$
- 5-digit display with programmable display colour, in red or green

## Highly visible LCD display with 2 colour (red and green) LEDs

The K3MA series comes with a process meter, a frequency/rate meter and a temperature meter of either 100 to 240 VAC or 24 VAC/VDC. All are equipped with the same quality display and have the same short depth of 80 mm .

- 1/8 DIN size housing
- Highly visible, negative transmissive backlit LCD display
- 14.2 mm high characters
- 5 digits (-19,999 to 99,999), K3MA-L: 4 digits
- Front-panel IP66

## Process, temperature, weighing and linear sensor indicators

These indicators with analogue input feature a clear and easy-to-use colour change display. All models are equipped with an IP66 housing. K3HB series is high speed, with a sample rate of 50 Hz , and even $2,000 \mathrm{~Hz}$ for K3HB-S

- Position meter indication for easy monitoring
- Optional DeviceNet, RS-232C, RS-485
- Double display, with 5 digits, in two colours
- $1 / 8$ DIN size housing
