# CX-OPC

## OPC- an open communications standard

Reduce your data integration costs with the use of open software.

### Key features

CX-OPC connects the OMRON PLC systems to the information world, - SCADA, MES or Microsoft environment using the open standard OPC client.

These products allow easy visualisation of machine information, through standard ready-to-use (graphical) components to create production and machine statistic reports or simple control applications.

No specialised knowledge of PLC systems or networks is needed to use these products. Any VBA or Visual Basic user can use OPC successfully.

The products represent a substantial time saving compared with conventional programming.
